Subject: Stop Ebola, Stop Silver Discrimination! Petition for Redress

Natural Solutions Foundation, [www.GlobalHealthFreedom.org](http://www.GlobalHealthFreedom.org), sought to get Nano Silver 10 PPM, proven in a Defense Threat Reduction Agency in vitro study, declassified in 2009, to regulate Ebola replication, to Sierra Leone and Liberia, thereby potentially containing the epidemic.

Although WHO says it is ethical to try any intervention, even if unproven, during the present crisis, the foundation's efforts to clinically demonstrate the surface decontamination capacity of Nano Silver topically, and the immune system support of Nano Silver as a dietary supplement, the demonstration has been stopped by cynical obstructionism on the part of some international and national public health agencies, and by the air transport carriers.

Obstructing the one natural remedy shown to be effective in vitro must stop!

I call upon all political leaders and public health authorities to expedite the shipment of Nano Silver to West Africa and its immediate deployment to help contain the epidemic.
