

The background of the entire page is a photograph of the South Carolina State House. The central focus is the large, brown, copper-clad dome, which has several small, arched windows. Above the dome, a flagpole with the South Carolina state flag is visible against a blue sky with scattered white clouds. Below the dome, the white portico of the building is visible, featuring several columns. The building is surrounded by lush green trees, and in the foreground, there is a flower bed with purple and pink blossoms.

Diabetes Under The Dome

March 15, 2017

9:30 AM - 4:00 PM

1st Floor Lobby

South Carolina State House

Diabetes under the Dome is an annual event brought to the Legislators and State House Staff through the combined efforts of the **Diabetes Initiative of SC (DSC)** and the Medical University of South Carolina (MUSC). This is an annual special event that offers attendees the opportunity to receive an assessment of their diabetes or an assessment of their risk factors for developing diabetes.

The DSC, along with healthcare professionals from around the state, will assess the levels of participants' blood glucose, A1c, cholesterol, and blood pressure, and also measure weight & height to calculate BMI. Physician and diabetes education consulting services will be available free of charge.
