Dr. Maceo Nance, President
S. C. State College
Orangeburg, South Carolina 29115

Dear Maceo:

During the discussion of the planning process to develop the statewide master plan at the Commission on Higher Education, the suggestion was made that perhaps a formal request should be made by the Council of Presidents for a postponement of the requests for a statewide master plan until one year after the new Commission is appointed. This would be in contradistinction to the current legislative request which is that a formal plan be returned by the newly appointed commission one year after the date of signing the act. That date, as you know, is March 6, 1979.

The purpose of this letter to you is to request consideration by the Council of Presidents that we ask the proper authorities, and I assume this includes the Governor, the Legislature, and possibly the Attorney General, that consideration be given immediately to delaying the required submission of the master plan by the yet to be appointed commission, for one year following the appointment of the majority of the commission members.

This will be a very important document. To try to prepare it under the present conditions of haste for the March 6, 1979, deadline is undoubtedly counter productive.

Best personal regards.

Sincerely,

William H. Knisely, Ph.D.
President
