Message:

Hi I was contacting you today with a concern about the South Carolina roads. I know that many of the roads around my city are beginning to be fixed but I have also noticed that many more of them are just being filled with gravel (pot holes). I believe that instead of filling with gravel that the roads or holes should be repaired in a more efficient way that will last longer. I believe that if they were correctly repaired the first time it would save more money in the long run if they were fixed to last instead of fixed monthly.
