**Subject:** Meeting Today with CIO and Folks

---

Chad

Marcia and I had a very interesting but frustrating meeting with the CIO folks. I think we are getting closer to identifying the problem but I am still not sure of the kinds of solutions we might or should recommend.

We have another meeting on Tuesday with the Agency CIO's and I expect that to be a little bit more informative but still a little contentious. Unfortunately, I think they see GEAR as a way out of their current troubles with the CIO. This cannot be "fixed" quickly but in the near term I think it is possible to make some significant progress.

I would like you to think about getting the Committee back together to see where we are and get an assessment from each person as to where we might think we are. I am ready to start thinking about writing some recommendations but I do not want to start on them without some idea about where everyone is headed.

I realize that in all likelihood not everyone in the group shares my view of the B&CB or the state of management therein. I think we can still get together and discuss what we are discovering without telling everyone everything we know or even making our findings clear. I really would like to hear what everyone in the group is finding and where they seem to be headed. I would like to see if Marcia and I are any where near where the rest of the group is.

Thanks.
