Subject: Death and Corruption in SC

---

How many more people in SC have to die before the Governor's office steps in to correct your direct board appointments! How many more Professional athletes have to lose their careers and be cheated by the SC State athletic Commission and SC LLR before anyone truly investigates the matter? Its been ongoing for years and the alleged corruption in the state is taking a toll on everyone who demands safe and fair practices in the state! Even the national media is now taking a hold of the stories surrounding the Governor's appointed SC Athletic Commission board. Many others are calling for a ban of athletes coming to SC to compete:

<http://mmamadhouse.com/mixed-martial-arts-news/death-and-corruption-under-the-sc-state-athletic-commission/>

Enough is enough and the next death in SC under the SC LLR and SC Athletic Commission is on the Governor's hands because you have been made fully aware! FYI the last athlete who just died in Myrtle Beach had an unlicensed Referee working his bout. Refs are required by state statute to all be licensed in that capacity in the state. That simple fact alone should warrant a wrongful death suit against the state. Coupled with the fact that he had never been certified or trained to actually be working the sport of OTSB. The blatant corruption and cover up of officials attempting to fix Professional fights is also grounds to make serious changes in leadership at the LLR office who are incapable of doing their jobs! If this was any other Professional level sport such as the NFL or NBA in SC these people would be in Federal prison! However professional combat sports are such a niche segment of the population in SC they are under protected and need help. Combat sports are also the ONLY sport that the state has authority over and this is the outcome.
