Your memo says:

"There is currently ONE and only ONE exception to this opt-in provision: for district whose SOLE purpose is the dredging of canals. This adds "waterways connected to canals" to that exception. While this may seem small, the fact is that "waterways" is not defined, nor is "connected"."

True enough, but the term "canals" is specifically defined, and defined in such a way so that only waterways connected to certain previously conveyed canals (which happen to be in Cherry Grove) are impacted. I intend to vote to sustain the governor's veto, but the argument that the bill would allow all waterways to be improved by funds yielded, with owners' consent, via an improvement district is not correct.
