

March 2, 2016

The Honorable Nikki R. Haley,

I spend my summers walking the beach and protecting the turtles. While I do this I also bring back as much trash as possible. This is what I can do for the animals and our shore. We all need to do what we can to protect our planet. Offshore drilling is not safe for the sea animals and is not clean. I have read about seismic testing and know this can not be good for the living things in the ocean. We all must think long term about what is good for our world. We just can't keep using resources and not think about the damage we are doing. Please do not support the efforts of the oil and gas companies.

Thank you for protecting South Carolina.

Dick and Carolyn Riley
