The Honorable Nikki Haley
Governor, State of South Carolina
Office of the Governor
1205 Pendleton St.
Columbia, SC 29201

RE: South Carolina Beach Damage due to Hurricane Matthew

Dear Governor Haley:

The beach communities of South Carolina thank you for recognizing the severity of Hurricane Matthew and commend you for your foresight in evacuations and initializing a state of emergency declaration. The state's response to last year's Hurricane Joaquin proved that South Carolina is committed to its beaches, and we urge you to continue that commitment by facilitating the restoration of SC beaches and enabling mitigation of future crises.

Individual beach communities are assessing and quantifying damages. We will keep you informed as to the volume of sand loss and the estimates needed for restoration. Due to the severity of this storm, it is anticipated that a similar, if not more substantial, state appropriation as the post-Joaquin \$30M will be requested.

During the storm, South Carolina beaches eroded, dunes collapsed, sand washed into roads, dune walkovers were displaced, pools were damaged, some houses were flooded, and tragically, fires destroyed some oceanfront houses in North Myrtle Beach. Pawleys Island breached in a number of locations and the Town Hall is a total loss. Edisto Beach, has become a national headline, suffering significant damages. But for the most part, lives were not lost and South Carolina beachfront infrastructure remains intact. These are all signs that our beaches did their jobs. Sand was sacrificed during the storm, but the majority of beach infrastructure, homes, and most importantly lives, were not.

Honorable Nikki Haley, SC Governor
October 18, 2016
Page Two

South Carolina beaches protect infrastructure while generating billions in tourism revenues for the state economy. We must continue to invest in this valuable asset and restore our beach and dune systems.

We would like to commend the S.C. DHEC OCRM for implementing prompt, short-term emergency orders for sand scraping, minor renourishment, sand bagging, and debris removal. This was a significant improvement over the post-Joaquin response and has eased the minds of the beach managers, allowing for immediate response to the hardest hit areas.

We acknowledge that the State's plate is very full with storm and flooding recovery efforts, but please help us to make sure the State does not lose sight of the needs and importance of healthy beaches and the healing such beaches can offer during traumatic times. The State must give preservation of the beaches the time, attention and funding deserved relative to their importance.

Finally, please keep in mind that large-scale beach nourishment projects are nearly impossible to fund at the local level without state or federal assistance. Other coastal states have annually dedicated State funding sources for cost sharing beach preservation projects. This is desperately needed in South Carolina.

We ask that you continue the State commitment to invest in the beaches of South Carolina, to preserve them as economic engines and for future generations.

Respectfully,

A handwritten signature in blue ink, appearing to read "Tim Goodwin", written over a horizontal line.

Mayor Tim Goodwin, City of Folly Beach
