Subject: Introducing the Portable Encoder!

---

Hi Tony,

Granicus is excited to announce the release of its **Portable Encoder** - an all-in-one hardware and software solution aimed at making it possible for you to easily record, manage and live stream meetings and videos in high quality - anytime, anywhere.

#### No Hassle

Our portable encoder is designed for ease of use, making it simple to record, encode and live stream high-quality videos from any location.

#### Secure

Each device is protected by a fingerprint scanner, a built-in Trusted Platform Module 1.2 chip, and a Kensington Lock for ultimate security.

#### Bring it With You!

The business of government doesn't always happen in an official council or commission chamber. There are town halls at schools, public meetings at the library and state of the community speeches at banquet halls. But while government happens outside your municipal offices, oftentimes providing high-quality webstreaming of these events can become cumbersome and costly.

#### Mobile

Each pre-configured encoder is delivered ready to stream from any location, anytime, with an internet connection. Simply connect to power and an audio/video source to record and encode.

#### Dependable

Our military grade encoder is strong enough to work in any video encoding environment, and protected by a best-in-class, 5-year, bumper-to-bumper warranty.
