Subject: Breakthrough for Foster Care data management

Hello,

The Network of Care for Foster Care consolidates all public and private services in the county into an easy-to-use search engine. It then provides key information to the foster child and his foster family, such as programs and services for foster parenting, transition-age youth, ADHD, adoption services, weight/fitness, diabetes management and more.

Even more important is the Foster Health Link – a Personal Health Record provided for each foster child. Here, we have created a way to store all important personal information from multiple agencies for each child in a fully secure record that the county can choose to share with a caregiver, foster parent or other county personnel. The result is a way to share critical information among all those involved with the care of a foster child.

Here are links you might find useful:

- A short YouTube demo about the Network of Care project, especially the Foster Health Link: Network of Care for Foster Care video
- A news report of the Ventura County, (Calif.) Web site's launch: Watch Mayde Gomez's report on KABC-TV about this easy-to-use Web site.

If you would like to learn more about the Network of Care or have a briefing for your leadership group, please let me know.

Thank you,

Bruce Bronzan, President
