Toxic Mold in the workplace, my wife worked for Walmart for 23 years. I need some help with this matter and I hope you will be able to do so! In 2004 she began to feel really bad and we went from Doctor after Doctor trying to get some kind of answers as to what was going on? She worked her way from a temporary cashier to assistant district manager in the 23 years she worked for this company! I went to pick her up for lunch one day and when I walked into her office inside of a Walmart supercenter which is a 12x24 office behind the dairy cooler I could smell Mold so bad that my eyes began to water. So I started to look for the smell and her office was covered with Black Toxic Mold. This was in 2005 and she went to Human Resource Management along with the Loss Prevention Manager and the Store Manager with this and asked to have it professionally cleaned! So they did nothing to fix the problem and my wife contented to get worse, in 2009 we went to a occupational and environmental Doctor in Charleston South Carolina and he told us due to the exposure to the Mold she had what he called Black Mold Brain and that it would continue to grow inside her Brain! She was on an Intermittent Leave of absence, but she was still going into her office and do what so could to help! To make a long story short she was fired for what the story Management said that she stole 20 minutes of time? She worked for this company for 23 years of her life and she would never take anything that she didn't work for, so they lied saying that she did this! Now we have a open case with OSHA! We need someone to help with this and spend the word about air quality in the workplace! Due to the loss of income we have now going to lose our home and no one seems to care about the wrongful termination and the loss of my wife's integrity and livelihood? Walmart needs to be held accountable for their wrong doing of not only her life but mine as well! Homeless in America due to what Walmart has done for our life! Thanks for your time and please HELP! I have a lot of pictures and samples of the mold. I'm not very good at writing but if this would help just one person in the world, it would be so great! Please help my family, I'm going to send this to other station as well, Dr.Phil, CNN, HLN and any one else I can think of. We need help finding a way to save our home! It's not all about money, it's all about my wife's health care! With no income or insurance she hasn't seen a Doctor since 2012!

Respectfully
Tim O'Shields
