

# Reading Performance in South Carolina

Statewide and District-Level Briefs

**SC EDUCATION  
OVERSIGHT COMMITTEE**

PO Box 11867 | 227 Blatt Building | Columbia SC 29211 | [WWW.SCEOC.ORG](http://WWW.SCEOC.ORG)

Like you, I envision a day when South Carolina is known more for its educational successes than its challenges. I look forward to a day when the performance of young people in this state has reached the goals and aspirations we have collectively set. We cannot reach these goals if we do not address the challenges young people face in reading.

We must first know and understand the data related to reading before we can begin to identify strategies and “best practices” that are targeted to communities and young people.

This report gathers state and national data available to provide a comprehensive overview of the challenges South Carolina’s public school students face in reading. Although this information is publicly available, it can be a time-consuming task to put it together in one place. This document provides those data related to reading in each South Carolina school district – in one document.

I look forward to the EOC’s discussions with legislators in late 2010 and for the continued dialogue and focus on reading beyond those meetings.
