EMD has gotten reports from Aiken regarding thunderstorm damage this afternoon (not from any tornadoes that some were forecasting, just thunderstorms). Thus far, the damage is mainly trees in roads and possibly some building damage. **Aiken County is at least partially opening its EOC**, and EMD is sending one of its regional personnel there tonight.

Kim Stenson will follow up with a better damage report, but it may take some time. No other issues have been reported.

No action from the Governor is requested at this time.
