NetworkFleet ROI.pdf

Spring is definitely in the air and with the start to Q2 2015 I have attached the Q2 equipment promotions for you. A few offers I would like to highlight based on recent conversations with some of you:

\$150 B2B Smartphone device Activation BIC: (4/1/15 – 6/30/15)

- New activations \$34.99 plan minimum.

\$50 B2B Basic Phone Activation BIC: (4/1/15 – 6/30/15)

- New activations \$34.99 plan minimum.

\$100 Off New 4G Tablet Promotion: (Current-TBD)

- \$99.99 LG G-Pad 10.1
- iPad Minis starting at \$229.99
- iPads starting at \$329.99

I have also included a great case study with ROI on Fleet Management from one of our partners NetworkFleet. I will be including these types of solutions and partners we work with going forward because Verizon has added many wireless solutions to our portfolio as technology and customer demands have changed.

Did you know Verizon can assist with tracking any type of asset in the field along with being able to see how that asset is performing in real time?

I have provided the below link so you can see some of the challenges Verizon is helping our partners like you solve. Please let me know if you have any questions or would like to discuss how Verizon can help you on any upcoming technology projects.
