My most humble regards to you and your staff,
Keep our flag there!

You have shown what a person with money and power can do. It is not a pretty picture for the tax payers in this state now. Taking the property on "Main ST" Greenville is the move for 'common good' of all those Rich and Famous NY Elite and may it bring jobs here; We are growing in the Upstate.

Where will we go when the brown shirts come for us? Where do the people go when they are led in the wrong direction? Ask and you shall receive. I am paying more than \$3,000 dollars for tax. Your tax base is the middle class. The Elite and poor don't pay taxes.

The Millions of illegals, both foreign and domesticated, now are destroying our State and Nation piece by piece. What and when and why and how will you stop the slaughter? I know you must care, and your family lives matter. The police in our county got their new Sheriff Will Lewis. And others will get shut out of their plays. The elephant's chain is broken.

Not only you; but your enraged followers fell in with you. If only you could feel our souls you could understand the valor of our Memorial Dead. It is both sides of the nation; both North and South. Our so called leaders; LG and TS fell for the ditch. They ditched us all. The crybaby from 'no friends' is a joke.

Just in case nobody told you, thousands of people in this state love their history. Not any of you're made up referrals to being born in the USA. I read your book. It is pitifully full of 'poor me' treatment when you were in a beauty contest. Divide and concur is your Moto. When you would not agree to allow the R. E. Lee's battle flag a few inches on the S. House Grounds, you dug your own political trench.

If history repeats itself; our taxes have doubled and tripled in this state. Your appearance to stop the killing of unborn babies is pitiful. Your 19 weeks share the pain in their death. What will you do next? Your leadership for jobs has given away our tax base. Greenville, SC at this moment has 5 or 6 new hotels in downtown area being a little NY type structure. Come and see it. NY and NJ have moved in.

We are a nation that is being divided by strife and conflict. I am sitting in this state watching and knowing what this state has done to our tax base. Your inviting companies in for a "free lunch" (sans taxes) is not my idea of helping to bring jobs into our land. You are making "Your Name"; we do not care about what your name in DC looks like for your prestige. Your looking in a mirror makes you see who you are. The floods gave you Media attention. That's over now. We need your attention at the basis of our educational system. The lessons they are teaching our children leaves out our history. You better keep the bottle of water; looks like DC and the USA will need to replace the lead water now.

Greetings to the Governor of SC. Nicky Hayley:

Nicky Hayley
