Brad can give you all pertinent details, but it will be live streamed, a transcript should be available shortly after the event, and I am not sure what other access there might be.

Happy New a Year! I hope things are going well in South Carolina.

I will Justice Corrigan.

Will a DVD or written transcript of the presentation be available?

No worries Taron, one of your staff should do!
Could you please send the contact information to Brad
So we get the staffers linked in?

Justice Corrigan,

Thank you for providing notice of this presentation. While I will not be able to attend or watch the presentation on the web, I will be forwarding this message to members of my staff.

Again, thanks and I hope you are having a wonderful holiday season,

Taron

Hi all, this is something really significant that I have been working on at AEI. I hope you can take time in your busy schedules to at least view the webcast or come in person to DC! I believe it is a real way forward for child welfare, nit tied to class action litigation. Best, Maura

Preventing harm to children through predictive analytics

Friday, January 22, 2016 | 9:00 AM — 12:00 PM

AEI, Twelfth Floor | 1150 Seventeenth Street, NW | Washington, DC 20036

Leaders in predictive analytics discuss its promise in reducing harm to children and the challenges it faces moving forward.

DESCRIPTION

Abused children are among the most vulnerable populations in America. The harm they suffer carries lifelong implications. Yet prevention remains difficult for social services agencies: Hundreds of children still die each year at the hands of caregivers.

This conference will discuss predictive analytics, an important new innovation that uses caseload data to predict which children are at highest risk and allows child welfare agencies to direct resources accordingly. This concept has been successfully implemented in some agencies but is still relatively new.

Join AEI for a discussion of how this innovative approach can be applied at the state level, with presentations from organizations responsible for developing these models, state child welfare commissioners, and the chair of the Commission to Eliminate Child Abuse and Neglect Fatalities.

Join the conversation on social media with @AEI on [Twitter](#) and [Facebook](#).
