Subject: Defund Planned Parenthood ~ Website email from Dexter James

---

Lt. Governor Bryant, To each one of you: I am a huge supporter of LIFE. Life is precious no matter the age, gender or race. I absolutely abhor the fact that I as a taxpayer have no say in what my tax dollars support! I do not want one penny going to Planned Parenthood from my taxes, nor do I feel that I should have to support through the Healthcare Act when I purchase insurance. An organization that harvests organs and tissue and vital body parts from babies and then sells them to the highest bidder, should not receive one federal dollar. There are great organizations which give free services to women that do not receive federal funding, so the argument that women will be denied excellent health care is clearly a misnomer. I appeal to each of you to remove the taxpayer funding which allows this organization to murder and then dismember innocents babies for profit. Patricia James
