## Free Webinar: Future of Value-Based Care in Workers' Compensation

If you have not already registered, do it now so you can join Dr. Randall Lea – an orthopedic surgeon and senior research fellow at WCRI – for a free, one-hour webinar on Thursday, January 10, 2019, at 2 p.m. ET. , as he discusses the fundamentals of value-based care (VBC) and its potential use in workers' compensation.

Things you will learn:

- What VBC is
- Six common payment methods used in VBC and how they work
- Strategies used in VBC to improve quality while decreasing costs
- Challenges to using VBC in workers' compensation
- How payment methods and VBC strategies might be transferable to workers' compensation and why

"Some believe VBC will never come to pass in workers' compensation," said Dr. Lea. "Others believe the conditions are ripe for its expansion into injured-worker medical treatment and that we are only a few years away from broad adoption. The purpose of this webinar, like all of WCRI's research, is to educate without making recommendations or taking a position."

If you are interested in attending, register soon as 70% of the seats for this 500-person webinar are taken.
