Rob,

We are about to go live with the web site for our Southern Forest Products Export Conference to be held in Charleston this October 17-18. I would still like a quote from the Governor in support of this conference. Also, we would like the Governor to do the welcome to South Carolina if her schedule permits it.

I'll be presenting our conference web site at a regional conference next week, so we would like to firm up the Governor's input this week if possible.

I look forward to hearing from you.

Beth, Rob,

Were you able to work up a quote for the web site?

*"Job and wealth creation in rural counties across the South can be tied directly to growing global markets for our forest products."*

Agribusiness products is a more inclusive term, but I suggest forest products since this is a forestry conference.

Also, I used the South instead of South Carolina, since this is a regional (13-state) conference.

Hope this helps.

Hi Tim,

Looping in Rob Godfrey to get his thoughts on the Governor's quote. Do you mind sending over a draft of possible language so we'll have a better idea of what you need?

Thanks so much!  
Beth

Subject: Quote for Forestry Conference Web Site

Beth,

We are building the web site for our Southern Forest Products Export Conference and I would like to include a quote from the Governor. If she is in agreement, the quote could tie the importance of growing export markets for our forest products to the health of our : (1) rural economy, (2) forest industry, and (3) forests, in general. The quote would go on our conference web site and possibly on an email publication.

We could use the quote whether the Governor participates in welcoming attendees or not, but we still would like for her to welcome everybody at the start of the conference on

October 17, 2016.
