Subject: SAP- Public Budgeting Formulation Module

Everyone,

I just wanted to give you a heads up on an upcoming meeting.

We have lined up an SAP Presentation of the SAP Budget Module (Public Budget Formulation, PBF) which the state purchased several years ago but has not implemented. Funding is currently being sought to implement this statewide budget system. While this Office's focus is on the use of PBF to replace our STARS based legacy budgeting system which produces the state's annual operating budget, the PBF Module has great potential to be developed as a tool at the agency level for budgeting and planning. The presentation will be March 6<sup>th</sup> 2pm at DSIT 4430 Broad River Rd Room 105.

We are inviting several of our larger agencies with knowledgeable SAP/SCEIS staff to attend this presentation. I'll be sending out a formal e-mail invite to you later today or tomorrow. Feel free to bring appropriate staff that you feel would benefit from the presentation.

Thanks

Les
