Subject: Question from The Sun News

Chaney,

I am a reporter with The Sun News in Myrtle Beach and I am working on a story about local farmers trying to recover from the October flood. I have read various reports about the governor's position on accepting federal aid for farmers. I know the governor asked the U.S. agriculture secretary to expedite crop insurance payments to farmers, but I have read that she has not requested additional funding that is available. Can you explain what her position is? You can reach me via email or at (843) 626-0218. Thank you.
