

Governor Nikki Haley,

As a constituent, I would like to tell you about an issue. I believe that women who are pregnant, seeking an abortion, should have one month to make the decision. After one month of being pregnant, you should have enough time to make the choice of giving birth or not. As soon as you get pregnant, the baby starts developing, therefore abortion is murder. If you are not financially fit to have a child, there are other options such as adoption. I would strongly suggest that you consider making this a law. One month decision for abortion.

Sincerely,
Bryce Mader
