---

She went there today and the worker was very disrespectful to her and this why as her mother is reaching out to you because in all a actuality the system is playing with her because she was a working mother now she has to parenting for something she has no control of.. i told her to reach out the media sources and the newspaper on this situation... to put both agency federal and state under scrutiny

I would like you to look into the mistake that DSS to buy to remove my grandson. Because he had to Broken Bones by his knee due to the casting of his clubfeet and they trying to accuse my daughter and her husband of hurting the baby. They have supporting evidence to prove that it can be caused by moving the feet around to straighten out his severely clubfeet. The worker going on here say she said. The case is in Lexington County Family Court can Lexington County social services. Can you please look into this in a timely manner so we can get the baby back home to his loving parents thank you so much
