

February 25,2015

To The Honorable Nikki Haley, Governor of the State of South Carolina

The time has come for a peaceful revolution to retake our nation by retaking our national Congress. It appears very apparent that our national Congress is now made up of too many members whose first priority appears to be to get re-elected. This goal often skews their voting pattern from what is best for our country to how best will the vote get me reelected. Consequently we end up with a Congress which has lost sight of for why their constituents elected them.

The present time seems to be one of great opportunity for a change which I, and many others believe to be a potential answer to the problem and that is term limits for Congress. Looking at the landscape of our states, 31 states are being led by Republican governors many of whom are doing great things in and for their states and many of whom live with term limits, as does our President. Within these states at this time many of our state legislatures are controlled by Republicans and this scenario says to me that perhaps, with leadership from you, a groundswell movement could be started for congressional term limits.

We all know that Congress will NEVER voluntarily vote to limit their terms of service so I believe it is up to the people to effect this. However, leadership must come from people like you and each of the governors are in a unique position to lead.

Please consider this suggestion and its viability as it comes from an ordinary citizen/grandmother who is deeply concerned about our nation losing its way.

Ironically while recently the book "Unintimidated" I came across words by Rep.Paul Ryan who counselled:"If political leaders tackle tough issues they will have the people standing with them, their courage will be rewarded."

I believe the time has come to do the right thing for our country.....TERM LIMITS FOR CONGRESS

Sincerely,

Mrs. Marianne Kure
