

# The Practical Solution for AAAs, Senior Centers, Congregate Meal Sites and Home Care Services

SENIORSTAT is an effective, efficient way for you to reduce costs, automate data entry and improve the participant experience. It also lets you track seniors' activities and manage the day-to-day operations of your senior center, congregate site, or off site such as home care services, without additional labor or time.

## Introducing a Tracking System for Providers

SENIORSTAT is built around a convenient, easy-to-use card seniors use for identification and tracking activities at your center or out in the field. This card replaces paper and manual forms, dramatically decreasing the amount of time and money it takes to enter data. In fact, many senior centers that implement SENIORSTAT experience a significant ROI within the year they begin using the program. SENIORSTAT can also increase the amount of funding received due to improved tracking and reporting.

## Data Collection Improves Day-to-Day Operations

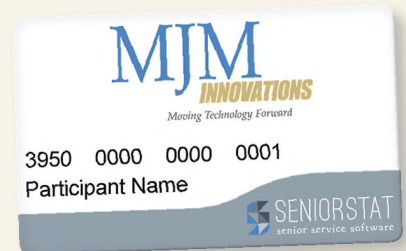

Our clients tell us SENIORSTAT has improved the way they operate. They are able to better track participant data such as:

- Meals
- Activities
- Attendance
- Volunteer hours
- Donations
- Demographics
- Transportation
- Home care services

SENIORSTAT allows you to evaluate the data you collect through a secure web interface. You can use that data to retrieve valuable information about the quantity and quality of care you provide to seniors. Plus, you can generate reports with the click of a mouse.

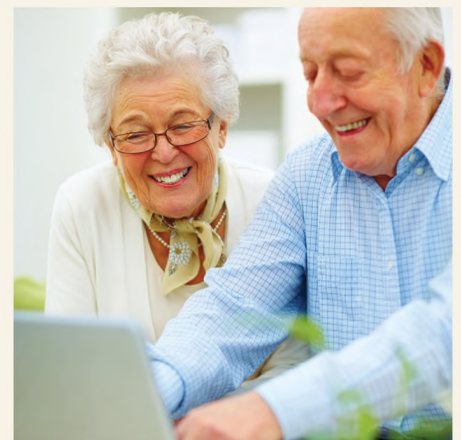

## SENIORSTAT Makes Life Easier for Everyone

SENIORSTAT provides agencies and providers with the benefits of a world-class technological platform that's easy for administrators and participants to use. Agencies can view data for their region. The system can work as a stand-alone solution or can integrate with most current aging software. Plus, seniors tell us they love the simplicity of using SENIORSTAT. The system helps organizations like yours focus on their most important task: providing care and support to seniors.

## HOW IT WORKS

- Your participant is assigned a membership card that looks and feels like a standard credit card.
- Each membership card has a unique account number that is associated with an individual participant.
- Participants swipe their membership cards for entry to activities, meals and more.
- The data from each participant's activity is tracked and available for reporting.
- Guest cards and volunteer cards can be assigned to your center.

## Features

- Track senior meals, activities, events and more
- Meal reservations, home delivered meals and transportation capabilities
- Manage program data online from a secure platform
- Import and export data into your current aging software or state reporting system
- Integrates with most existing aging services software
- State of the art reporting system
- Automate intake forms

## Benefits

- Reduce data entry costs
- Increase your funding with more accurate reporting
- Lets you focus on providing services
- Makes the collection of data simple and efficient
- Eliminate sign-in sheets
- View data for one or multiple sites

Thanks to SENIORSTAT, centers like yours are helping seniors live healthy, fulfilling lives because you're spending less time entering data, analyzing information and compiling reports.

SENIORSTAT can include:

- Terminal or touch-screen systems
- Mobile tracking device
- SENIORSTAT web portal
- Web hosted application
- Standard cards and card fulfillment
- Standard reporting
- 24/7 support
