Hey,

Coffee works...we'd just have to do it on a Monday or a Friday, since I'm generally not able to escape on session days.

I talked to a couple folks in the office, and there wasn't an obvious candidate. Ironically, if you had a Department of Administration or a CISO... Presumably you already have Jimmy on the agenda – did you ask him if he had someone in mind? I know he has a couple of security-related positions he's trying to fill...I'm not sure how far along he is in the hiring process, but I wonder if he'd have someone new on hand by then who could offer his/her comments, insights, and intentions going forward?

Sorry...wish I had more than that. For what it's worth, the IG wouldn't necessarily be a bad candidate to speak again if nobody with a more technical/policymaking role takes that slot. He has ongoing interaction with the Gov's Office, BCB, Revenue, and various other agencies, so more than most, he's been in a position to see many sides of this issue.

Happy New Year Christian,

Long time no talk with – I hope all is well with you. I have a request – the annual spring SCITDA meeting is coming up in March. I know you are busy with the governor's budget and legislative stuff – so I will not ask for you to speak again this year – but with the SC Hack and all that will be happening this legislative session regarding IT (and maybe restricting) can you recommend someone that I could reach out to? For the December winter SCITDA meeting we had the IG speak – I am not sure he would have anything new to offer – any ideas?

Thanks for any help / suggestions you might offer.

I would say let's do coffee – but I doubt you have the time.

David
