Hi! I've emailed, and called and gotten no answers. I've booked two campsites at the beachfront campground at Edisto for November. In the post about reservations becoming available it says to double check the campground map as some sites may have changed. But the reservation map looks to be unchanged. There is no updated map that I can find. I'd really like to know if the two spots I've booked are in the same places they used to be. We've booked sites 63 and 9.
