

Learn about the [Benefits of Using Soil3 Humus Compost](#). It's OMRI Listed for organic gardening.

Early Spring Turfgrass Tips

- **Lawn Mower Tune-Up:** Sharpen the blades, check the spark plug, clean the air filter, and check the oil and gas now so your mower is ready when you need it.
- **Post-emergent Broadleaf Herbicide for dormant well-established warm-season lawns** (Zoysia, Bermuda): apply 2,4-D for control of winter broadleaf weeds that have emerged, such as henbit and dandelions.
- **Exercise & Organic Lawn Care Tip Combo:** Spend a few hours weeding by hand! You'll burn calories, plus you'll be practicing organic lawn care.
- Although it seems counter-intuitive, it's fine to install most [dormant](#) warm-season grasses at this time of year. Follow the link for more information or call us with any questions.
- Apply our **Pelletized Dolomitic Limestone** to all yards except for Centipede. Proper soil pH is crucial for a plants ability to uptake important available nutrients. Application of lime (and all fertilizers) should be based on soil test results.
- **Don't apply fertilizer to warm-season lawns** just yet. Wait until after green-up in spring.
- As always, don't forget to **incorporate our [Soil3 organic compost](#)** into any new sod installation and to existing lawns for natural nutrients instead of fertilizer.
