August 20, 2014

Governor Nikki Haley  
State House  
P.O. Box 11369  
Columbus, SC 290211

Dear Governor Haley:

So what are you doing today? We're trying to bring attention to what is going on in the name of ISIS in Iraq/Syria.

We can no longer afford to allow these thugs to continue to grow stronger. For those who remember, and those who know history, this parallels what Hitler and his Nazi thugs did in the 30s and 40s. Remember Hitler was in jail and then when he was released it resulted in his forming the Nazi party and we all know how that turned out. So too Abu Bakr al-Baghdadi was in prison and then when he was released in 2009 he formed an Islamic organization now called ISIS, so history seems to be repeating itself. In 2003 Baghdadi was part of al Qaeda and was known even then for the atrocities he and his followers committed and there is no mistaking him as today's monster.

It's time you take action and notify your respective government to stand up and be counted! It is time for every self-respecting countryman to voice their anger against ISIS and demand military action is taken to completely destroy them. And it's time the UN takes action...and we do not mean just condemning them but approving military action.

When one is confronted with a rabid animal they put it down, so too should we put these rabid thugs down. Make no mistake about it they will be a threat to the world once they are allowed to establish their own country and then many weaker countries will recognize them as legitimate, and then look out!

There have always been evil people in the world but when the world is faced with evil in the magnitude that we see today one can only come to the conclusion that the Devil has raised his ugly head and has finally found a way to try and destroy the world.

All informed individuals surely recognize that there are individuals in the world who are sadistic and get pleasure in making others suffer, and that there are individuals who by themselves would not do what as a group they will do in the way of unspeakable things to others, and that there are individuals whose only aim in life is to gain power and control others. When you put these three eliminates together you have terrorists who will do the most evil things to others as ISIS who is the most vile group who inflict unimaginable pain, suffering and death on all the people they come intact with.

A right thinking person will recognize ISIS for what it is. A group of thugs currently terrorizing people in a territory that President Obama abdicated by refusing to negotiate with the Iraqi Prime Minister to leave support troops in Iraq after our pullout, while the government and their military became stable, because political status is more important to him than doing the right thing.

It is our understanding that misinformed young people from around the world are gravitating to ISIS and we believe this is partly a result of Social media, cell phones; video games (the thrill one gets from the make-believe battles), etc. which have created a different mentality in our younger generations today.

So what is wrong with our youth today? We believe it's the result of the freedom through technology they have today. Why do so many want to join ISIS and commit terrible atrocities against others? We believe it's the result of the thrill they imagine and envision as war games. Where have the parents been while these youth developed a delight in hurting others?
