---

Just wanted to let you know that a select few members from ABATE had worked this bill from the house and then through the Senate. Because of the many issues within this bill many times we had to press forward as a private citizen and not a member of ABATE. Please let the Governor know we are fine with this bill.

There was a difference in the section for permittee but as shown in the e-mail below Rick has taken care of it and it now has the same language as passed in S 689. This was one of the most hardest things I have ever been involved with and I am glad to see it passed.

Ralph
