BONUS ADDED TO OFFER ON SUPER METAL WORTH A FORTUNE. FROM ERASMUS OF AMERICA - MARCH 18, 2018

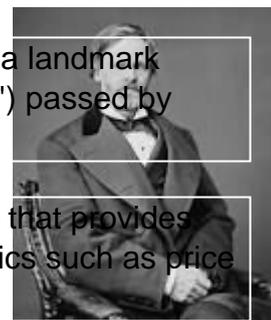

I once briefly had close access to an exile German scientific-engineering team who were trustees to some of the top secrets of Nazi Germany left over from World War II and apparently brought over to America under Operation Paperclip - codename for bringing into America ex-Nazi scientists and engineers. They did not share their true answers from Nazi Germany to American intelligence and pretended to be much lower rank German scientists and engineers than they were in reality. When the Fourth Reich arose in a new reborn Germany, they were according to the will of Hitler before he died to turn these top Nazi secrets over to this reborn Nazi Germany and this time from the grave Hitler would get his revenge on the Allies by seeing that that Nazified Germany defeated the Allies this time including America and Russia. But I was not foreseen in Hitler's vision of the future and got their top secrets instead of the future Fourth Reich of Nazi Germany once reborn. I had spent all this time in military schools, the heavy historical scholar for years and could speak like a Communist to Communist spy sources and talk like an apparent Nazi convert to exile Nazi Germans in America now. I could talk of Karl Marx's secret plan how to conquer America eventually by pushing for free trade instead of fair trade and by engineered international price war eventually bankrupt American society and by default turn America into a Communist economy and nation by bankrupting it first and then filling in the collapsed American economy and nation with Communism taking over America and the world then.

Amazon.com is used as a front for Communist China driving America into a planned collapse of the American economy as all these long established national chain stores go bankrupt one after another such as Kmart and then Toys "R" Us and eventual goal of China is bankruptcy for America and then Communist America as the final engineered result for the Karl Marx secret economic weapon of uncontrolled price war to drive America and other capitalist nations in eventual bankruptcy across the world and then world reborn as a world Communist empire and one world Communist government over all nations on earth. At one time America had some national leaders with brains and they passed the two key laws to protect the American economy from planned bankruptcy of America engineered either from within America or else from abroad such as China trying to always underprice American products until we are driven into national bankruptcy. Karl Marx wrote a brilliant defense of tariffs and why they

must be overthrown to weaken the capitalists and capitalist nations until bankrupted by price war. The two laws to protect us from bankruptcy through Communist price war against the capitalist nations were:

The **Sherman Antitrust Act (Sherman Act, 26 Stat. 209, 15 U.S.C. §§ 1–7)** is a landmark federal statute in the history of United States **antitrust law** (or "competition law") passed by Congress in 1890 under the presidency of Benjamin Harrison.

The **Clayton Antitrust Act** is an amendment passed by U.S. Congress in **1914** that provides further clarification and substance to the Sherman **Antitrust Act** of 1890 on topics such as price discrimination, price fixing and unfair business practices.

**President Donald Trump is by instinct heading in the right direction by proposing tariffs which Karl Marx defended as too brilliant a defense of capitalist or free enterprise nations against ruthless price war to bankrupt them while tariffs survived. I don't propose driving Amazon.com out of business. Only force them to pull away from deliberate price war to drive all competitors out of business and let them match quality against quality in markets for products offered in America and below a certain price market markup to intervene and invoke the Sherman Antitrust Act and Clayton Antitrust Act to force price war prices back off the market and let the competition be over the quality of products and services offered instead of price alone determines who gets the sale and who does not in the American market. Let tariffs be negotiated and concessions made on both sides so the national industries of nations across the world can still compete but with fair trade negotiated from practical standards for both sides instead of ruthless price wars which will bankrupt nations which allow such practices to ruin the national markets allowing it instead of fair trade to maintain support for decent profits and jobs for all Americans wanting to work in American industries, stores, farms, etc. in America. If all American industries are fast bankrupted, this eliminates most jobs in America and soon we are likely in a depression far worse than the Depression of the 1930's engineered by the cabal to pick up at bargain prices much of the national assets at bargain basement level prices and then World War II allowed to restore a national economy but now much more owned by the cabal than before the Depression of the 1930's. I studied under six of the most brilliant economists of**

**American and Europe including a German economist endorsed by Albert Einstein when still alive as teaching the most brilliant economic science taught in the world for the century we were in. It was scientific free enterprise based upon the smartest tactics in free enterprise to make national economies grow and faster for the benefit of the people and national economies involved.**

**To the Nazi scientific-engineering clique I knew how to talk Nazi to the Nazi scientific-engineering clique, had some elite military academy background, appeared to them very smart in science and engineering and so briefly was part of their secret group in America. When I got all their secrets but one left from Nazi Germany, I one day approached their secret location, no one there, door unlocked, and I went in. I knew where they had this top secret Nazi metal formula for a metal many times stronger than the West had during the Cold War and also lighter than expected for such super strength. I did this spur of the moment. Got their top secret Nazi metal formula out of their files, quick copied it and did not hear him enter, but their gorilla of a security guard came in, grabbed me by the neck from behind, and told me to hand over my copy of this metal formula and do not ever try it again or next time my neck would be broken. That was the end of my contact with them. I having written down the entire formula which was nearly a page long, I almost remembered the entire formula but too big to remember at random. A couple of medical sources have told me that due to having written down the entire formula and even remembering most of it, under hypnosis should be able to recite the whole formula word for word and number for number of the formulas making up the entire super metal. I also discovered separately knowing how many alloys were put into the formula and knowing its final weight and how much tensile strength it really had, I could maybe without even hypnosis recreate the entire formula by checking a periodic table for the elements and knowing weight, etc. for elements used. And I had one trick the Nazis did not. I had from elsewhere got a process that could triple the original strength of this metal without adding any weight to it. The Nazis did one smart thing in America and without American security knowing it had it exposed to radiation at a nuclear research lab and radiation could not penetrate it and**

go through. They were not thinking of EMP nuclear attacks but I assume their test meant that EMP radiation could not penetrate it either. My logic says only one test remains. Can a lab run it through tests and find out how the original metal was made. If not, then could easily be used to manufacture cars, boats and planes with especially since it is lighter than iron or steel. But if it could be figured out how it was made by lab tests, then restricted in market to military weapons such as tanks, planes, naval ships, etc. and not for civilian use. But if the secret to the formula can remain trade secret, then the market for it is virtually unlimited and could put America through a new industrial revolution in world trade and all nations wanting to buy products made from this. Also, if used with bridges, etc., they should never collapse during construction or afterwards and likely last potentially forever by usual standards. And I had the secret process answer how to make it three times stronger than the Nazis ever did so could even patent it but that would be dumb. Keeping it trade secret like the Manhattan Project of World War II the smart way to go and would be tested and manufactured at my planned Camelot site once built and operational which would be by fast tactics of engineering like Walt Disney used for his Disney World at Orlando, Florida. The research has already been done on this metal formula, so as long as I can faithfully recreate this Nazi metal formula one way or another and a bonus of three times stronger than they could make this metal, we then have a commercial metal worth so much as to go astronomical in profits if we can supply national and world markets as fast develop in the world for it. Cost of manufacture might be in similar range to making carbon steel, etc. I studied mechanical engineering with an engineering school and to me engineering is engineering regardless of what branch you work in. I once had a brilliant engineering friend of mine show me his secret how he could learn any new branch of engineering fast as lightning and so headed up national projects such as building the national highway project down in one nation in Latin America. He was always on top of any branch of engineering by his trick system. Told a few technical friends of mine how his system worked and all understood it instantly and thought it terribly clever to learn new engineering virtually overnight. Will teach this system to my technical crew at my Camelop Research & Development Center

once it is built. I by experience find that asking people to back some project for noble or idealistic reasons gets weak financial backing in comparison to offering a super commercial offer worth a vast fortune to people who understand technical and sophisticated commercial products for sale in marketing nationally and internationally. I will of course use some share of my own personal profits made with this metal formula to help pass my proposed Omni Law in America as shown on my website, will financially back the world promoting of the Christian Gospel suddenly worldwide thus fulfilling Matthew 24. And setting up the Vatican-Soviet endorsed industrial food process which then fulfills the Old Testament prophecy of Exodus 23:25. But most of this money will be held for all sorts of commercial projects likely after the metal formula becomes a commercial smash success such as this would once available to the market. You can put in \$10.00, \$25.00 or larger amounts into my Omni Law Loan Program shown on my website, and up to the next \$10 million raised in loan money you get divided pro-rata based on your share of the next \$10 million raised 10% of all net profits made from the metal formula for the next 30 years from when it hits the market and you worry about paying any taxes on this huge money anticipated paid to you as it should be paid to you at least once a year and we get rolling super great, might up this to two royalty payments a year on net profits paid out to you per your pro-rata share of the next \$10 million raised. We might pay lower taxes by two royalty payments per year on net profits from this metal formula that way. I know the ways of the world and we do not give title to these loan credits at this time so only you can receive the income from your royalty payments. This does not qualify under law as securities being offered then as they must have a title to them so you can sell or transfer these as securities to others. This is merely a loan you make to us for a share of the net profits on the metal formula for 30 years and not subject to security laws which would put at risk protecting the trade secret nature of this metal formula. If under law, we can maintain as total trade secret how this metal is made, might later then decide to add a title to these loan credits listed in your name with us. If we were considering this, would want to ask you first if you prefer we change to a title added to these loan credits with us or leave things as they are. We would also pay you the usual terms

offered to those who already have loan money in our Omni Law Loan Program and added this new 10% royalty paid only to you who joined on our offer on the net profits made from this metal formula and participated while this new \$10 million loan cap is being reached on this offer. Everyone in our loan program all get an annual stated royalty on net profits on our trade secret Vatican endorsed and Soviet Union endorsed food discovery my father made which both sides said was the likely most important food discovery in human history and could potentially solve the twin problems of malnutrition and starvation in the world. And Stalin from the Soviet Union sent word to my father that his advisors indicated to him the nation ending up with the food discovery made by my father should become the industrial leader of the world and potentially the richest nation on the earth after this due to the world food market this industrial food process would create worldwide. So put in what you want if only \$10 or even such as up to one million dollars or more into our Omni Law Loan Program to join this metal formula offer while still available as an offer to our supporters. Smaller amounts such as \$25.00 or \$50.00 or \$100.00 or even \$1,000. or even up to \$2,500 into this loan program you can pay through PayPal. For larger amounts than this, contact us first and we will give you instructions what bank account to put this into and we will credit you right away once we receive your loan money, Our Omni Law Loan Program is shown on our website, and if you can't use PayPal, then send check, money order, etc. made out to NIFI and mail to NIFI, P.O.B. 1465, Seneca, SC 29679. If a problem, we will let you send cash but hide it well so no one can see it in your envelope to us. And give us your name, address and email address to send receipt for money received. Canadians and other pro-Western people can join with us as we are international movement to help spread Christian and Western culture throughtout the world. Our website is [www.fastboomamericaneconomy.com](http://www.fastboomamericaneconomy.com) Our main email address at this time is [miraclebread17@gmail.com](mailto:miraclebread17@gmail.com) named to honor our Vatican and Soviet Union endorsed super food discovery as publicized in the Catholic Digest during the Cold War in the 1950's. Pope Pius XII endorsed this as potentialy greatest news for mankind since the coming of Christ since it could potentially solve the twin problems of malnutrition and starvation in the world. Yours for God and Country, Erasmus of America (pen

**name for a Christian leader who spent eleven calendar years in military academies and also heavy military intelligence background in military intelligence. F.B.I. came from their Greenville, SC office in 1990 to my large retail store I owned then in SC and asked me to save America from a pending World War III with Soviet Union then. Said their F.B.I. computer files rated me one of handful of most brilliant military intelligence brains in America and they briefed me why World War III was anticipated for America. I already knew the Moscow plan by connections of my own and pulled the strings to keep America out of a pending World War III. I have printed this F.B.I. story several times and never arrested for lying about this. They would have arrested me like hornets let loose if this story was a lie. A Russian general had planned how to totally annihilate America and I had a trick way of blocking his plan. I had Russian connections neither side knew about! And I pulled strings where needed to save America from potential nuclear annihilation. All Moscow needed was 5 minutes delay in response to attack and America was then annihilated according to this Moscow plan. This story is true!**

**Offer expanded 4:00 PM March 18, 2018.**

**Already won on top ultimate weapon system design and technology of Nazi Germany. Pulled in top engineer of America during 25 years of Cold War and we completed their technology and ultimate weapon design I nicknamed "THE WRATH OF GOD." This engineer was never wrong on any engineering stand while in national defense projects and showed America how to launch Polaris Missiles from submarines under water. We will build and rent this to Wash., D.C. for guaranteed annihilation of any nation trying to start nuclear war with America and can be modified for potential absolute air defense system for America. This can also be used for weather control to change weather in parts of the world. The Nazis never saw this angle with this weapon system. I spotted it and this never wrong super genius engineer agreed with my concept of air defense with it and weather control. Now I show my true aces from the Nazi side. We potentially can bring rain to drought areas and block tornadoes and hurricanes from threatened areas. We can use this to purify ocean water into fresh drinking water for world. More uses also. For example can destroy asteroids heading towards earth to threaten it with collusion and potential annihilation of earth if it hits earth. I will not turn over this weapon system for Wash., D.C. to have, but only to rent our services of its use as we will allow no other nation to build these if they figure out how we do this. We will train and maintain the military crews for this. 10% of what we bring in as income on this added to pot of royalty on 10% royalty of net profits for 30 years so there is no**

gamble you won't receive income from Nazi captured technology I had access to. This is a guaranteed delivery of workable answer whereas metal formula I think we can pull off but this is a guaranteed delivery on for commercial use to produce income with for this 30 year period. Some federal claimed land to be signed over in claimed title to us to build this Wrath of God at. I named it this as this can deliver on this name given it. This weapon system prophesied in Bible given to the saints in the Last Days for the prophesied Camp of the Saints St. Augustine said we would build in the Last Days as the final defense for the Christians on earth in that future age which is present age as of now. The community of the Essenes predicted this community in the Last Days and hoped they would be the prophesied community. They did not last pass the fall of Jerusalem in 70 A.D but this prophesied community prophesied in the Bible will be built. A real prophet met with me when on vacation from military school years ago and predicted correctly a series of things that did happen and leading to the building of this community that I am supposed to build by plan of God. St. John the Divine and Apostle of Jesus Christ predicted this event for Latter Day Christianity. This and the Exodus 23:35 bread and water are both to occur at same time in history in the Latter Days. I was just shown by revelation how little in faith the Christians really are in this age, so have to reveal what is prophesied to happen in order to give faith to the weak in heart in Christ.
