Message:

Governor, I hate to say this, but you are a traitor to the south. That flag had nothing to do with those honorable black folks dieing that day. The flag represents an area of the country tired of the federal government sticking their noses where it didn't belong. I have some wonderful friends that are black,so I am not a racist. You cannot get rid of hate by removing symbols. The flag is an inanimate object. It neither loves nor hates. It only represents a time when a section of this country came together to try and evict Tyrony from our midst. Election time is coming.
