**Subject:** Future Governor election

---

Kevin Bryant: I viewed your commercial on our current road situation it's pretty dire to say the least. However this is not a new issue. Have you considered doing away with the personal property tax platform? I believe if we just raise the state sales tax all residents and tourists we could finally get these roads fixed. It's a joke we all know (Malfunction junction). Just the fact that it's called that is terrible. It worked for Florida. As soon as you cross the state lines your on smooth roads. Think about the property tax elimination . I believe that would get you elected alone. Do you remember Jim Hodges what got him elected? His quote if you vote for me I will have a state lottery system in place within a year, if not I will leave office. Well he kept his promise . One other thing we need someone to step foward on this Dominion/Scana deal. 180 billion into the state economy , 1000 dollars to Sceg customers. This is a no Brainerd there are no other deals on the table. Rick Baier Lexington S.C  
Please feel free to share with our current lieutenant Governor.
