The Republican Party has declared an eight year on the President of the USA and indirectly on the country and the people. Almost half of the people believe that he is Muslim and not born in the United States. I believe that you, Gov Haley are not a woman's governor, you are not a worker's/people's governor. Under your government, South Carolina will continue to live like yesterday instead of looking to the future. South Carolina could be a national leader, but doesn't have a chance under the Republican party. Look at the state of all things South Carolina and you see the past. We as a state could do better.
