How can a simplified infrastructure reduce operational costs?

Dear Nikki,

Every day, you are faced with more devices using wireless connections to access your corporate network. But many other devices, including PCs, servers, IP phones, and printers still use physical connections.

Your network administrators must manage and provide high-quality service for 2 often siloed networks - wired and wireless – increasing your costs.

Don't manage your networks separately. Unify them.

**Unifying your networks** will help you:

- **Reduce network maintenance costs** with less hardware to deploy and maintain

- **Increase your IT efficiency** by simplifying, centralizing and automating operations
- **Increase employee productivity** through Bring Your Own Device implementation that you can easily manage

**By how much?** Find out now with our [free ROI calculator](http://conversation.alcatel-lucent.com/LP=2841?elq=b7e625e2f3fe41938178b4a07493ec6d&elqCampaignId=2666&elqaid=6344&elqat=1&elqTrackId=df6492d954a044e7a83b81cc881368e4)
