---

Marcia,

I wanted to follow-up regarding this email.

In my conversation with Ted this morning, I told him that Drivers History was the only application being delivered at this time. He is familiar with NIC and asked if we were going to be delivering additional services in the future similar to what we have done in other States. I told him that we hope to, but nothing else was on the table at this point.

It appears that he assumes from what we have done in other States that we will be taking on more. I will be glad to follow-up with him to clarify if you would like.

Jeff McCartney

Ms Adams:

I wish to acknowledge receipt of your letter dated April 7th regarding driver history files and MySCGov.com. I have to admit that I didn't read this communication very carefully and failed to notice that it related to access to driver history records only.

In a conversation I had this morning with Jeff McCartney I was assured that Experian will continue to receive regularly scheduled shipments of vehicle data until he and MySCGov assume this function the near future.

I believe that your records show that Zena Bania is primary contact but this should be changed to reflect my name. When the time comes for the changeover I wish to make certain that you have my current contact information as shown below.

Thank you,

Ted Hotham
