NATIONAL SCIENCE FOUNDATION
4201 WILSON BOULEVARD, ARLINGTON, VA 22230
OFFICE OF LEGISLATIVE AND PUBLIC
AFFAIRS

Award Date: Aug. 24, 2015
Award No.: 1510157

We are pleased to notify you regarding a recent National Science Foundation (NSF) award made to University of South Carolina at Columbia with an intended total amount of \$348,172.00.

This project, entitled "UNS: Selective Catalytic Conversion of Syngas-Derived Dimethyl Oxalate to Ethylene Glycol: Mechanistic Insights from In-Situ Surface Vibrational Spectroscopy," is under the direction of Christopher Williams. The award starts Sep. 01, 2015.

The abstract and other information regarding this award will soon be publicly available via the NSF Award Abstracts database at
<<http://www.nsf.gov/awardsearch/showAward.do?AwardNumber=1510157>>.

The National Science Foundation (NSF) supports research, innovation, and discovery that provides the foundation for economic growth in this country. By advancing the frontiers of science and engineering, our nation can develop the knowledge and cutting edge technologies needed to address the challenges we face today and will face in the future.

We greatly appreciate your interest in the work of the National Science Foundation. If you are interested in developing a press release or have additional questions, please contact Amanda Hallberg Greenwell, Head, Office of Legislative and Public Affairs at (703) 292-8070.
