### South Carolina State Parks

at 12:15:36 on 7/21/2021 UTC · 🌐

With the wet and warm weather, a lot of fungi are showing up at Jones Gap & Caesar Head state parks! One of the families of fungi you might see is the Clavariaceae family, collectively known as the coral fungi due to their resemblance to aquatic coral. They come in a variety of shapes and colors! Here are just a few pics of some we've run across! [www.southcarolinaparks.com/jones-gap](http://www.southcarolinaparks.com/jones-gap)
