**Subject:** Top Colleges for STEM Students

---

Hi Tony,

The U.S. Department of Education has forecasted that STEM-related occupations will grow as much as 60% by 2020. While the field has long been underrepresented by women and minorities, we believe now is an excellent time to help change that. That is why we've created a new guide: *The Best Colleges for STEM Students*

In this research article, we discuss:

- Some of the best colleges for students pursuing careers in STEM fields.
- The importance of STEM fields in the future
- Why we believe expanding diversity in STEM fields is important
- Scholarships for STEM students and group

We're reaching out to organizations in an effort to reach as many students as possible and wanted to see if you'd help us in this effort by **adding a link to our STEM guide here: <http://recs.sc.gov/resources/students/pages/scaspirations.aspx>** .

*Why should you consider linking to our resource?*

- Highlight academic support for women and minorities in STEM
- Help students see the value of pursuing a degree in STEM

Please reach out with any questions or feedback you may have about our site, this content, or our request.

Thank you,  
Ashley Fuller
