Well what the heck is "MUTCD"? You got me on that one.

What about the MUTCD conformity issues? Wouldn't DOT need to weigh-in and potentially participate in the design process based on that too?

Subject: Highway signs

Happy Wednesday!

Fred McConnell and I had lunch yesterday after our meeting with the RECs and he gave me some background on how GA did their highway signs.

We talked about what worked and what didn't so here is what I propose we do.

Small counties-5 signs

Medium-7

Large-10

County can decide where to place.

3x5

We should just put the SC Work Ready Community logo and we'll need to ask DOT about putting the date underneath but also if there is some way to put new dates on the signs if counties are re-certified, without having to take the signs down.

This is what I envision.

Under the attached logo

2013-2015 (centered)

Can you ask Ted to check with Corrections to see if they can make these and contribute as part of the SCWRC and get blessed by DOT. I suspect that their district DOT people would have to put up the sign and would they provide that in-kind too????

Thank you!
