Doncheste County why they haveing all this
flooding, I wrote them to let after better
Hyu it is mean food it Doncheste County.
Ditch need to be D is out & get deep.
There should be map even in Doncheste County
All County need to do Thorojob. before.
Hyu 1-26. I 95. why you haveing to closed
down interstate. Arger. not doing there
job. or there should be a lot of ditch
down 2-26. I-95. Both side of interstate.
That is mean food. water have no more
to go. why are not planning right you
County food flooding out State Road flooding
out I may there is no ditch. you must
County and State Start doing Thorojob. Thoro
job is to protect citizens of South Carolina
not by closing Road. you have edisto River
not deep enough to handle all this
water. I a Doncheste County. They need
get with our Governor. come up with
a way to have edisto River Ditch 50 feet
more. This why are have all this back up
water. All these canals 12 Doncheste
County and other need to start doing this
out there canals 35 feet. you must
have all this water on Hyu. no one
is planning right. people have to go to
work. When our State closed Roadway

every one sitting down waiting for
something happen first you must hold
Dorchester County were I have responsible
for those flood. All other County too.
if they would do there job. we
want have all this water backing up
in people yards. I live off Auburntown
Road in Richsville. Ditch not Deep
enough to hold running water. all
Ditch should 8 feet Deep. you want
have water back up in people yards.
Dorchester County you Dont no
who to write to about this. They
Dont have no information on who
run what, each County should both
print of who running ~~the~~ what-
agency. I Hope our governor learn
from this. Have each County in
Her State to Start mass Ditch
Program, you Cant not wait
for something to happen. Then get
on TV ask Citizen tax payer to
stay off Streets if our law maker
in Columbia do there job we
would have all this flooding problem
they want to fight each other
Just like in Washington. Eclisto
River must Be Deepen than what it is
and those Cattle. Each County must
Report Back to governor with
map where water going to go
when there lot of rain

I-26. Donchaster Road you have all
This Traffic Back up and Hyw 78
This is main Road in our County.
Donchaster County need Train System
Why you think NYC and other Big City
Have Mass Train System, But South
Carolina we want to live in Stone age.
No one is Doing nothing in Columbia
for Citizens. But Closing Road. If you
Pitch those Ditch Deep enough, you
would Have water running Cross
I-26 - I 95. on Hyw 78 in Donchaster
you Have Agency Sitting Down Drawing
free checks. That why Donchaster
County Have all This water problem.
If Donchaster County would Ditch out
those Candles we would not Have
To Close School on Roadway. Those
Candles must be Dis Deep than there
one. it up to our governor to get
with these County have them Dis
out there Candles 40 feet Deep.
Each County must Report Back to our
governor water map were is.
These Ditch is going all Ditch.
By law must be Dis 15 feet Deep
This Should be State Law. you would
Have To Close School on Business. State
Cause Business To lose money by
Closing Down Roadway. Because our
governor not planning Right.

you need to Hire me I Should
How to fix These water problem
you cant not Allowed These
County play game with These
Citizen Hire a our governor
Should That Edisto River to Be
Dis Deeper Than What is Now.
Edisto Should Dis 50 feet Deep.
That would Stop All Those
Floods Cross our State.
Charleston Battery. Wall need
to Higher Than it is our
governor Should do this. you have
Written Concerning Cross Battery
~~Water in Charleston~~ Charleston
That. Could flood out Down Town
in ~~Char~~ Charleston. and
Dorchester County. To. why wait
for citizen in Charleston to get
tall first before you take action
Battery Wall in Charleston. need
~~not~~ to 15 feet. you cant
no let water from Ocean Run
into City like That. Wall need to
Raise up fifteen High. protect citizen
and Business. if there to Be Big
Earth quake you have to water
Run Down High King Street. Low
Marker in Columbia. Sit Down
Drinking Coffee. no one is planning
Nothing. That why I ~~not~~ Half
to write you. to much Sitting Down.
