Am I allowed to harvest edible mushrooms found in SC State Parks?

**South Carolina State Parks**

at 14:38:58 on 10/05/2020 UTC

May I collect rocks, berries, nuts, roots, leaves, mushrooms or other forest items for personal consumption or use?

All components of the habitat protected by South Carolina State Parks are important to the plants and animals that live there. Therefore, the collection, injury, manipulation or removal of any forest items including minerals, plants, plant parts, or mushrooms for personal consumption or use is NOT allowed. Activities, such as, rock stacking destroys sensitive burrows and is NOT allowed. Additionally, hunting wildlife of any kind is NOT allowed on SC Park property. However, collection of any of these items for scientific research purposes is permissible but requires the researcher to apply for a special permit through Resource Management.
