Hi Nikki,

My name is Dani Neiley and I am an assistant editor for American Infrastructure Magazine. I was wondering if you would be interested in writing an article about the infrastructure work that you've done for South Carolina for AI's Summer 2016 issue?

The article is called the Governor's Message, and it runs roughly 750-1000 words. As long as it's within the topic of infrastructure, you can write about whatever you see fit - such as any projects you've undertaken or want to undertake, or ways that your state has used or plans to use infrastructure, for example.

Please let me know if you're interested or if you have any questions. Thank you!

Best,  
Dani Neiley
