Governor Haley,

If you care about special education for children that require classes of this nature please do something to help them. As a concerned citizen I feel it necessary to inform you of a situation in Horry County. A Teacher's Assistant that has been hired to work with special ed children. She can not do basic math or language and can not read. She needs the help of the other workers to help her understand what is required of her. She was hired to meet a quota and she can not be fired because of her race. Is this fair to the children? Or dose it even matter?

For the sake of the children that have difficulty learning the simplest of things, please look into the situation that exists in Horry County with the Special Education Department.

Thank you

A Concerned Citizen
