Subject: State employees

Dear Governor,

I voted for you and I have been a huge supporter with me being a gay Republican. With that being said I would like to bring to your attention something that has been bothering me. I work at Office Depot on Harden street and with us being so close we get a lot of state employees as customers. I'm very happy that they want to come to our store but there is a problem. Everytime I ask a state employee if he or she has a reward card with us they laugh and all have the same response that "it's not our money". This really upsets me as a tax payer of our great state. Our rewards program is free and helps save money. I think that if there were to be a bill passed requiring all state employees who make purchases with a state card get a reward or bonus card which are free, then out state debt would lower even more. Please take what I am saying into consideration. Thank you for being our governor!

Sincerely,
Thomas C. Strickland
