Subject: VisionConnect™ Free Accessible App from the American Foundation for the Blind

VisionConnect™ is a new, free, accessible app for iPhones and iPads from the American Foundation for the Blind that gives support to people losing their vision. You as busy rehabilitation professionals and teachers as well as doctors and other health care professionals can use the app to provide information about vision rehabilitation services to individuals with vision loss and/or their families. VisionConnect™ provides:

- A directory of services searchable by service, zip code, and distance, available in the U.S. and Canada.
- Resources and tips for living independently with a visual impairment.
- Links to useful information on [VisionAware](#), [FamilyConnect](#), and [CareerConnect](#).
- Information on products and technology.
- Personal stories and employment advice.
- A way to save directory search results and email them.

You can learn more about the app at [AFB VisionConnect™ App](#) and download it for free at [afb.org/apps](#).

Help us spread the word about the VisionConnect™ App! Doctors and health care providers are in the unique position to educate patients about the VisionConnect™ app. They can "prescribe" VisionConnect™ to patients who need information about services and living with vision loss and provide them with information to encourage them to download and use the app. You can order patient information packets and share them with doctors and health care professionals in your community. Each packet includes 10 mock prescription pads and 10 rack cards. The materials are free; you pay only \$10 to cover the costs of shipping. To order, go to www.afb.org/store/visionconnect.
