Christian and Nick,

Let me reiterate Todd's comments and add that the tour went extremely well. Governor Haley acknowledged that many of the positive items on her radar screen are being stimulated and enhanced by the work of IT-oLogy. It was a very good day.

Thanks to each of you for your partnership as we move forward on these important issues.

Lonnie

Subject: Thank you!!
Importance: High

Christian and Nick,

On behalf of myself, Lonnie and everyone here at IT-oLogy, I want to personally thank you both for getting Governor Haley to attend the event this morning. I hope she found value in it and enjoyed learning more, etc.

Let me also say many, many people personally told me how much they appreciated her being here. She scored huge points by attending and obviously understanding the topic. I know she's not in it for the 'points' but the response was overwhelming.

We sincerely hope she becomes more involved in the future. We think technology impacts the economy in a huge way and we would love to work with her moving forward. She has done a fantastic job since being in office.

Todd
