Prisoner Transport Systems Presents

Rear Partition Systems

Prisoner Transport Systems offers a wide variety of patented rear partition seat systems to suit all of your needs and allow you to maximize space in both the cargo area as well as the seating area. Our OS-Belt™ designs ensures maximum safety for officers and prisoners alike. PTS has worked directly with the vehicle manufacturer to provide you the safest and the toughest transport solution on the market. PTS products are built, tested, and certified to be SAE (Society of Automotive Engineers) and FMVSS (Federal Motor Vehicle Safety Standards).
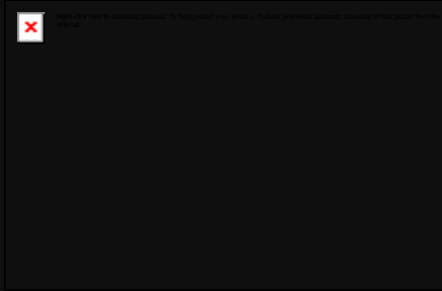

LEARN MORE

Door Panels & Window Guards

Escape prevention is a real concern when considering a transport solution. PTS offers a door panel that is molded to fit directly over the factory door. This allows for easy installation and minimal modification to the door to maintain the value of the vehicle. Combined with PTS window guards that are available in polycarbonate or traditional metal mesh, your

vehicle doors are protected from anything a prisoner can throw at it.

Floor Pans

The passenger area can see a lot of foot traffic during the course of a patrol. PTS floor pans make it easy to clean up after your watch is over. Our floor pans are paired with V-Drain™ technology to make even the dirtiest of passenger areas clean with just a rinse.
