Sir

I believe the pension fund bailout and gas tax are criminal. I believe the SC Congress should be investigated for criminal behavior by attorney general Jeff Sessions. It is tantamount to money laundering what has been done to the money that was in the pension fund and highway funds. The Stock market has gone up more than at any time in history and we are told our pension fund lost money.

We had a surplus in our budget and money designated for roads. Can't find it. HMMM isn't that interesting. This is criminal and should be investigated.

I plan to boycott tourism here in SC and encourage my family members and friends not to spend money in this state in Charleston or Myrtle Beach. The only time our representatives seem to care about the voter is when they are running for office or trying to make money. I hope that the result of gas tax is a boycott of the tourist destinations here in SC.
